This is the second semester of a two-semester sequence in graduate-level Abstract Algebra. Topics include the Axiom of Choice and some of its consequences, modules and algebras, categories and functors, and an introduction to algebraic geometry.

There will be a midterm exam on Wednesday, Feb. 26 and a final exam on Monday, May 5.

Your course grade will be determined using the following weights:
   class participation, 30%
   graded homework, 30%
   exams, 40%
and your letter grade will be based on the scale:
   80–100: A; 70–80: B; 60–70: C; 50–60: D.
